Diagram 5 illustrates the process of attaching the front panel. Two people are shown working on the unit. One person is holding the top of the panel, while the other is guiding it into place. An inset shows a close-up of a hand using a screwdriver to tighten a screw on the panel's edge. Another inset shows two options for the panel's internal structure: one with a grid pattern and one with a cross-hatch pattern, with the latter marked with a large 'X' to indicate it is incorrect.
