Our mattresses are put to the test

To test strength and durability we use a machine that simulates the movements of a person weighing 140 kg rolling around in bed 50,000 times. A pressure gauge measures the effect on springs and fillings. The construction must hold up to the highest requirements.

Care instructions

Complement the mattress with a mattress protector or a mattress pad. It makes it more hygienic, as it is easy to remove and clean. Some mattresses and pads have a washable cover. Read the tag inside the cover for more information. Make sure that the zipper is closed when washing the mattress cover. Vacuuming the mattress helps to remove dust and mites. Use upholstery cleaner to remove stains. If your mattress is turn able (making the head end the foot end and vice versa) you should turn it about every three months. Turning a mattress ensures more even wear and helps to prolong its comfort. Don't fold the mattress. It can damage the springs and materials inside. Even the best mattresses become less comfortable with age, and all mattresses accumulate dust and mites over the years so we recommend that you change your mattress every 8-10 years.

90-day exchange policy

Your comfort is important. If, even after the one-month adjustment period, you are not fully satisfied with your mattress, simply return it and exchange it for a different model. You have a full 90 days to decide whether the mattress is right for you.

Before using for the first time

Initially your new mattress can seem a bit too firm. Allow one month for your body to get used to the mattress and for the mattress to get used to your body. To get the best comfort you need the right pillow. Make sure that you have a pillow that suits you and your new mattress. Roll packed mattresses regain their shape after 3-4 days of use. All new materials have their own particular smell, which gradually disappears. Airing and vacuuming the mattress will help to eliminate the smell.
